August 3, 2011

1 Summary

This file includes information on U.S. patent applications published between March 15, 2001 and December 31, 2010. The USPTO began publishing applications in 2001, under the American Inventors Protection Act.¹ The data were extracted from the USPTO's *Cassis* BIB Applications DVD.

The dataset includes the application number, publication number, application date, publication date, title, and patent classes at publication.

```

```

title_trim                                         Title (Trimmed to 80 digits)

```

```

      type: string (str80)
unique values: 2157101                             missing "": 0/2625950
examples: "Derivatives of succinic and glutaric acids and
          analogs thereof useful as inhibit"
          "Iontophoresis method and apparatus for systemic
          delivery of active agents"
          "Methods of bonding metal surfaces, and components
          therefor"
          "SMART ARTEFACT AND USER TERMINAL HAVING A SHORT
          RANGE INTERFACE AND LONG RANGE I"
warning: variable has embedded and trailing blanks

```

3 Data construction notes

Application numbers can be linked to inventor information in the applications20012010_inventors file, and to issued patents in the bib19752010 file. Application numbers and publication numbers can also be used to merge to PAIR application data (coming soon).
